Roadmap themes and planned ecosystem projects

AI/ML-enabled applications & use cases
- Wearable human augmentation technologies
- Field technologies for defence (wearables)
- Immersive audio technologies and communication

Architecture and platforms for IM
- Immersive Digital Life in Built Environment
- Industrial metaverse platforms for sustainable manufacturing

Technology enablers for IM
- ML/AI-enabled energy efficient communication and security
- New technology enablers for digital-physical fusion and human augmentation

2024   2025   2026   2027   2028
