# **ROBOTICS IN HEALTHCARE**

FINAL REPORT

11/12/2020

# Why this study and seminar

- **Demand** for advanced digital health solutions is **growing** fast globally
- Robotic solutions come with a great promise to bring increased efficiency and quality of care into health and wellbeing
- Finland has significant talent pool in electronics, mechatronics and software
- Yet Finnish robotic solutions in health are few and far in between

Business Finland / Smart Life Finland program wants to see what we can do to stimulate the birth of an innovation ecosystem in health robotics

# Some housekeeping remarks

Kindly mute your microphones, turn off video unless speaking

We encourage you to introduce yourself in the chat giving the other participants the possibility to reach out and network with you later

Please submit your questions in the chat. We are monitoring the chat and will address your questions. During Q&A we can also open the microphones

# Look for the questionnaire in your email inbox

As always we highly appreciate your **feedback** 

Plus some extra questions to:

BUSINESS FTNI AND

- Gauge **your interest** in the segments presented by Frost & Sullivan
- Let us know if you are interested in **participating** in or **leading** an innovation ecosystem on robotics
- Find the most relevant **themes** and **leaders** to continue this work with

- 1. In which of the areas below do you have capability and willigness to co-innovate with other partners?
- 2. What type of competence / know-how would you bring to the collaboration?
- 3. In your opinion, what are the main **challenges** in the segments you chose in the 1st question
- 4. What could be the **scope** for the potential followup co-creation project?
- 5. Would you be interested in **joining** the cocreation workshop organized by Business Finland in this area?
- 6. Would you be interested in **taking a lead** on the preparation of the co-creation project of your interest?

BUSINESS FINLAND

### L. If interested – kindly let us hear from you

- 2. The BF team will analyze your input
- 3. Given sufficient interest & enough interested organizations, BF will facilitate 1-3 co-creation workshops aimed to refined the ideas and start building the base for a co-creating project hopefully leading to coinnovation – and new Finnish robotic solutions for health and wellbeing
